Pickett, Ray & Silver, Inc. is a full-service engineering, planning, and land surveying firm. Our headquarters is located at 22 Richmond Center Court in St. Peters, Missouri is centrally located in St. Charles County and provides easy access for our clients.

Pickett, Ray & Silver, Inc. has been providing quality engineering and surveying services continuously since 1969. Our dedication to excellent customer service and professional project management continue to set the highest industry standards. The deep history with our clients is a product of quality and respectful service. Our distinguished clients include numerous cities and counties as well as public and private firms.

Pickett, Ray & Silver, Inc. established its roots in the counties of St. Charles and St. Louis, branching out to most of the surrounding counties in Missouri. We are currently licensed in Missouri, Illinois and Kansas and have projects taking place in the major metropolitan areas of St. Charles, Independence, Annapolis and western portions of Illinois. As our clients explore opportunities across the United States, we will continue to provide our specialized services to the ever-expanding horizons.

Pickett, Ray & Silver, Inc. has two distinct divisions working together to provide the best possible product to serve your needs.

- ❖ **Engineering Division** – Provides a variety of services which include planning and improvement plans for commercial and industrial projects, residential subdivisions, municipal projects and institutional campuses. We've incorporated new urbanism and sustainable design into many of these projects. Other engineering services include roadway and highway design, stormwater collection and management, pumping systems, water distribution systems, hydraulic studies and drainage design, transportation planning, construction management, and construction observation.
- ❖ **Land Survey Division** – This division consists of registered professional land surveyors who can provide boundary and topographic surveys, control measures by global positioning systems (GPS), construction staking, as-built information, mapping, right-of-way, and easement exhibits. Our survey staff includes FAA certified drone pilots which can provide low level aerial photography and topography.

Pickett, Ray & Silver, Inc. utilizes up-to-date software technology for site development and design. This software provides the tools for transportation and site engineering, hydraulic analysis, 3D modeling and survey for integration of field data.

Our professional staff's reputation for reliable services and results oriented standards is the key reason for much of our business success. We are proud to be a part of the exciting development in and around Missouri.

Our Mission:

To Provide Professional Services and Creative Solutions that Meet Our Client's Needs
